

# Professional Services test review - additional tasks

With Ron Feathers and Ravinder Pahngli  
2nd November 2021

# Thought process....

- Understanding the methods and processes required to implement this functionality into the design.
- Providing a simple yet effective interface for the customer to interact with.
- Calculating monthly payments for the customer based on the unit price, for ease.
- Working systematically through the tutorials to better understand and digest the information on the coding.
- Implementing a "don't give up" attitude.

# Product implementation to the site.

- Successful implementation of products to the site and link to Splitit.
- Inclusion of monthly payments based on unit price.
